### React Native Developer, 06/2017 - 10/2018

#### Ideo Sp. z o.o. - Rzeszów

I took part in following projects:

- A React Native application for Android and iOS that to record working time based on the history of telephone calls. The application allows to assign spent time to a specific case and a specific client. However, iOS does not provide call information for developers.

A rewritten React Native application for Android that allows to manage franchisees servicing with following functions:

- scanning goods by barcode,
- displaying information about product prices,
- comparing similar product price available in other stores,
- distributing newsletters and information bulletins for franchisees,
- displaying data on the sale and purchase of goods,
- contacting with representatives,
- delegating tasks to employees,
- sending push notifications (Firebase Cloud Messaging).
