SUMMARY

Experienced React developer who is passionate truly about mobile app development. In my career I would love to gain greater knowledge in software architecture of mobile apps.

LANGUAGES

English: B2

Upper intermediate

EDUCATION

Engineer, Computer Science, 10/2014 - 02/2018

Państwowa Akademia Nauk Stosowanych - Krosno

The applications I developed during that time were from the following industries:

- **fashion / clothing industry** - Approx. **100K**
- **food / retail industry** - Approx. **100K**

I took part in following projects:

- A React Native application for Android and iOS that to record working time based on the history of telephone calls. The application allows to assign spent time to a specific case and a specific client. However, iOS does not provide call information for developers.

- A rewritten React Native application for Android that allows to manage franchisees servicing with following functions:

- scanning goods by barcode,
- displaying information about product prices,
- comparing similar product price available in other stores,
- distributing newsletters and information bulletins for franchisees,
- displaying data on the sale and purchase of goods,
- contacting with representatives,
- delegating tasks to employees,
- sending push notifications (Firebase Cloud Messaging).

Apprentice, 06/2017 - 11/2017

Ideo Sp. z o.o. - Rzeszów

Developing a React Native application for Microsoft Windows thanks to the react-native-windows library. The application wraps a website (Webview) and allows to use this page just like an application, i.e links to external websites launched the browser.
